### New Technical Note on Threshold Effects in Price Transmission

The analysis of price transmission helps to identify the nature of the relationship between geographically distant markets and cross-commodity price transmission, as well as the impact of liberalization policies and the identification of regions exposed to systemic shocks. AGRODEP Technical Note #22 contributes to the debate between symmetric and asymmetric price transmission and presents the traditional and new approaches for detecting threshold effects in price transmission while highlighting their advantages and limitations. There is no one-size-fits-all method for detecting threshold effects in price transmission. Researchers need to select a combination of elements (context of study, the economy under consideration, data availability) to justify their choice. Aside from the presentation of the methods for detecting thresholds in price transmission, the authors perform an application in the case of the rice market in Senegal.

### Insights from the 2021 Africa Agriculture Trade Monitor

The fourth annual Africa Agriculture Trade Monitor (AATM), edited by Antoine Bouët, Getaw Tadesse, and Chahir Zaki, and released in September 2021 examines how the African Continental Free Trade Area can maximize its potential and presents COVID-19 recovery polices to support more resilient livelihoods for agricultural producers and formal and informal traders. The report covers African trade with global markets, includes a special focus chapter highlighting COVID-19 impacts, and a chapter on competitiveness of African livestock products. The final chapter looks at regional integration experiences in Northern Africa, with a focus on the Arab Maghreb Union. AGRODEP members Leila Baghdadi, Zouhour Karray, Lulit Mitik, Abdoulaye Seck, and Chahir Zaki contributed to the volume.

### **Commodity Price Monitoring in Kenya and East Africa**

In collaboration with IFPRI's Food Security Portal, AGRODEP members are engaged in monitoring commodity price trends and variations in selected markets in East Africa. The monthly reports for Kenya by Ruth Chepchirchir and Joel Maina cover maize, beans, rice, wheat, and Irish potatoes in major Kenyan markets. The monthly series for East Africa by Annet Adong and co-authors cover the evolution of weekly maize and rice prices in Kenya, Rwanda, Tanzania, and Uganda.

## FEATURED NETWORK MEMBERS

Dr. Leila Baghdadi is a citizen of Tunisia and has been an AGRODEP member since November 2012. Leila is a Professor of Economics at ESSECT, University of Tunis. Before joining the University of Tunis, she worked for the United Nations Development Program (UNDP). She holds a B.A. in Economics from the University El Manar (Tunis) and the University of Aix Marseille and an M.A. and a Ph.D. in International Economics from University of Paris 1. Her research interests include international economics, firms and entrepreneurship, migration, and political economy.

Dr. Abdoulaye Seck is a citizen of Senegal and has been an AGRODEP member since November 2012. Abdoulave is director and co-founder of Institut d'Etudes Economiques et Sociales (Institute for Economic and Social Studies - www.iees.sn) and is a Professor of Economics at Cheikh Anta Diop University. He has been a visiting professor at universities in Senegal, Mauritania, and Guinea. He holds a Ph.D. in Economics from Suffolk University, Boston, with a specialization in International Economics and Econometrics. His research interests include international trade, productivity and efficiency analysis, and applied econometrics.

Dr. Zouhour Karray is a citizen of Tunisia and has been an AGRODEP member since April 2012. Zouhour is a Professor in the Department of Economics at the University of Tunis. She holds a Bachelor's degree in Economics from the University of Sfax, Tunisia, a Master's degree in Industrial Economics from the University of Toulouse I, and a Ph.D. in Economics from the University of Toulouse I. Her research interests include industrial organization, international economics, and private sector development, value chains and competitiveness.
